- Note**
1. Cut the AC input before checking any mal-phenomenons.
  2. Make sure the INPUT&OUPUT were in right situation before connected to power supply.
  3. Be ware of high power pressure may caused by short circuit when installing metal casing products.
  4. All the images and data are just for reference, specific please in kind prevail!

- F&Q**
- A. First use, connect the LEDs to the power supply, correct AC&DC connection, but the LEDs are not light or other fault condition.  
 Q. Cut the AC input, check whether there are any poor contacts in the AC and DC terminals.
- A. Correct connection, the LEDs is on but the brightness is too strong/too weak/flashing.  
 Q. Cut the AC input, check whether over load or short circuit.
